

All-in-One ISP Enablement with **AnexGATE**

A Unified Solution for Managed Internet, Security, and Remote Connectivity

Overview

As ISPs expand to serve home, business, and distributed enterprise users, the demand for **secure, high-uptime, value-added services** is at an all-time high. Customers expect plug-and-play connectivity, smart access control, secure browsing, and reliable performance even across multiple WAN links.

AnexGATE offers a fully integrated solution that combines **zero-touch provisioning, user-level AAA, web content filtering, SD-WAN intelligence, and VPN infrastructure** into a single stack – designed specifically to be hosted, managed, and scaled by ISPs.

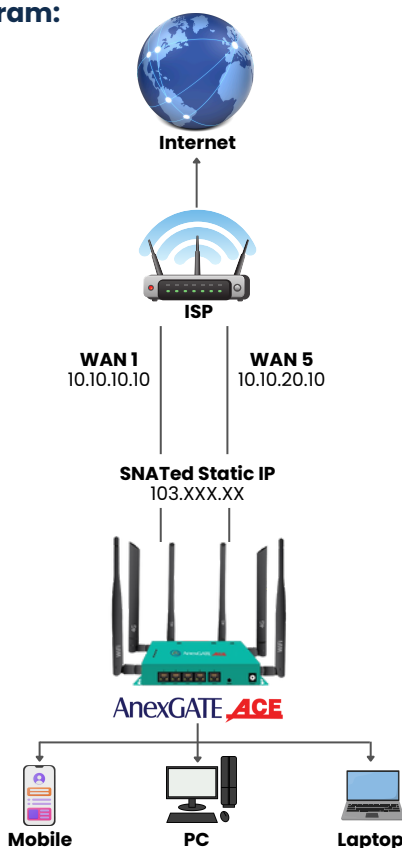

The Solution

By deploying AnexGATE's unified platform featuring **AnexHUB, AnexSPOT (AAA), AnexShield, ACE SD-WAN Router**, and the **AnexGATE VPN Concentrator** ISPs can deliver a high-performance internet experience with:

- Seamless cloud onboarding
- Smart WAN link management
- User-based access control
- Web filtering and threat protection
- Secure branch-to-HO VPN tunnels

All of this is managed via a centralized cloud dashboard, giving ISPs full control and visibility across their entire customer base.

Network Diagram:

Key Features

- **Dual WAN Failover + Load Balancing** If one link fails, the router automatically switches to the second link ensuring uninterrupted internet
- **Zero-Touch Provisioning (AnexHUB)** Auto-configure and activate routers without field visits
- **AnexShield Web Filtering** Block malware, adult content, social media, or other unwanted categories
- **SD-WAN Performance Optimization** Prioritize critical traffic and auto-route based on application needs
- **Cloud VPN Concentrator** Enable secure tunnels between remote branches and HO over ISP networks.

Benefits to the ISP

- **Fast Customer Activation** – No on-site configuration needed
- **Full Visibility** – Monitor usage, status, and security from a single portal
- **Built-In Security & Compliance** – Content filtering and user logs by default
- **Flexible for All Use Cases** – Homes, cafés, schools, SMBs, enterprises
- **Revenue-Ready Services** – Offer managed VPN, SD-WAN, or parental controls as add-ons
- **Auto Failover Ensures Uptime** – No disruption during link failure

Why Choose AnexGATE

- **End-to-End ISP Partner** – Not just hardware, a full-stack solution
- **ISP-Native Design** – Cloud-managed, scalable, and deployment-ready
- **High-Performance** – Smarter routing, zero config, and reliable protection
- **Built to Support Growth** – Designed to scale with evolving customer needs and service offerings.
